

Plan:

- What research will you need to do on your issue?
- What do people in your Company already know?
- What is your suggestion for helping your community?
- When can you give your presentation to your Company? Will you give your presentation alone or with others?
- What do you hope the Company will learn from your presentation? Will you include an experiential component to the presentation, where everyone does something rather than just listening?

Do:

- Give your presentation and generate ideas for a service project.
- Form an Expedition Team and make a difference!

Review:

- What do you know now that you did not know before?
- What plan did your Company decide on? What other good ideas were shared?
- What do you feel you taught the rest of the Company about the issue you chose?
- Will you continue to try to make a difference on this issue?

Safety Note:

What risks are involved in your project?
How can everyone stay safe?

It starts with Scouts

Human Social Issue Library

Leadership

The Adventure:

There are many underpublicized and under-addressed issues in our society. Choose a topic or issue that's important to you (such as LGBTQIA+ equality, racism, the income gap, homelessness, animal rights, habitat destruction, etc.), research it and find a way that you can make a difference.

Present your issue to others in your Company. Include a question-and-answer session. Brainstorm ways that your Company can take some action on your issue, then form an Expedition Team to follow through with the idea you've generated!
