

From Seed to Sky

BAGHEERA'S HUNTING GROUNDS Environment

The Adventure:

Have you ever planted **Scoutrees**? How big were the trees you planted? Were they little seedlings, small enough to fit in your hand? Or did you plant much bigger trees—maybe even trees taller than you?

Most trees come from seeds. If you want to see how a tree grows from a tiny green sprout to a tough little seedling, you and your Pack can plant seeds early in the Scouting Year. By spring, your little trees might just be ready to plant at your Scoutrees event.

One day, your tree might reach high into the sky!

Online Resources:

- Tree Seed Kits
- Scoutrees

Safety Note:

- How can you be prepared for insects when planting trees?
- What plants should you stay away from when planting trees?

Plan:

- What will you need for this adventure?
- Where will you get your tree seeds?
- How will you care for your tree? How long will it be before you can plant your little tree?
- When and where will you plant your seedling?

Do:

- Plant a tree from a seed, and take care of it until it's ready to be planted for good.

Review:

- What do you know now that you did not know before?
- What did you enjoy about this adventure?
- Where did you plant your tree?
- What kind of tree did you plant?
- How can you keep taking care of your tree even after it's been planted?
