11 SUSTAINABLE CITIES
AND COMMUNITIES

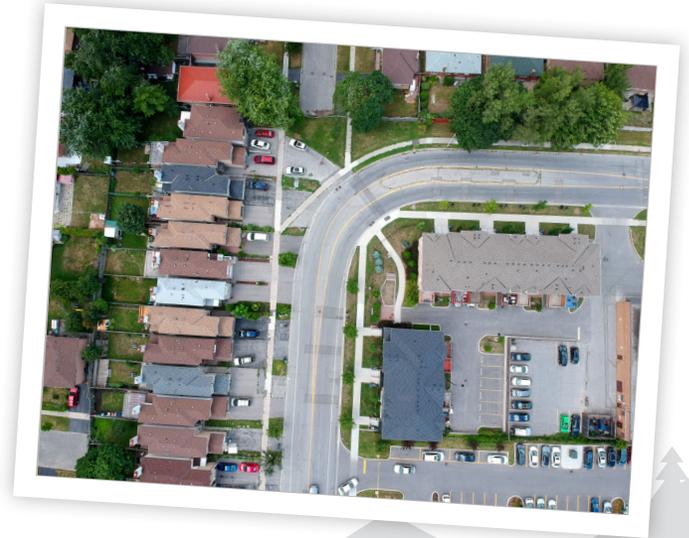

What You Will Discover

Find out about safety awareness and prevention in your local community.

The Adventure

Safety first! Using a permanent marker and a plastic tablecloth, draw your community with important landmarks like fire stations, police stations and hospitals. Test out safety scenarios using vehicles and workers. Identify each type of safety helper as you place them in the community. In what situations would you need help from different safety workers? Try building your own ideal safety community using all of your knowledge!

It starts with Scouts.

Plan

- What materials do you need for this activity?
- What are safety landmarks and people in your community?
- What do you need in an emergency to stay safe?

Do

Using **#ScoutsDoStuff**, share your safety map with friends, family and your community!

Review

- What did you discover about safety in the community that you did not know before?
- What was your favourite part of this activity?
- What would you do differently next time?

Safety Note

- How can you stay safe while out in the community?
- Be sure to practise your street sense when on roads as a pedestrian!

Try this

Keep it Simple

Use costumes and props of various safety workers, and in Lodges, Lairs or Patrols, identify the right people needed for various safety situations. Role-play the situations to get the emergencies under control and keep the community safe! Bring in a community member to help explain their safety role.

Take it Further

Do a community safety scan as a Section. Look at lighting, signage and cycling safety in a neighbourhood. Take notes on possible changes to make your community safer and reach out to your city with your suggestions!
